Operation Instruction

2013 EverFocus Electronics Corp

Please read this manual first for correct installation and operation. This manual should be retained for future reference. The information in this manual was current when published. The manufacturer reserves the right to revise and improve its products. All specifications are therefore subject to change without notice.

All rights reserved. No part of the contents of this manual may be reproduced or transmitted in any form or by any means without written permission of the EverFocus Electronics Corporation.

Precautions

1. **Do not install the camera near electric or magnetic fields.**
Install the camera away from TV/radio transmitters, magnets, electric motors, transformers and audio speakers since the electromagnetic fields generated from these devices may distort the video image or otherwise interfere with camera operation.
2. **Never disassemble the camera beyond the recommendations in this manual nor introduce materials other than those recommended herein.** Improper disassembly or introduction of corrosive materials may result in equipment failure or other damage.
3. **Try to avoid facing the camera toward the sun.**
In some circumstances, direct sunlight may cause permanent damage to the sensor and/or internal circuits, as well as creating unbalanced illumination beyond the capability of the camera to compensate.
4. **Keep the power cord away from water and other liquids and never touch the power cord with wet hands.** Touching a wet power cord with your hands or touching the power cord with wet hands may result in electric shock.
5. **Never install the camera in areas exposed to oil, gas or solvents.**
Oil, gas or solvents may result in equipment failure, electric shock or, in extreme cases, fire.
6. **Cleaning**
For cameras with interchangeable lenses, do not touch the surface of the sensor directly with the hands. Use lens tissue or a cotton tipped applicator and ethanol to clean the sensor and the camera lens. Use a damp soft cloth to remove any dirt from the camera body. Please do not use complex solvents, corrosive or abrasive agents for cleaning of any part of the camera.
7. **Do not operate the camera beyond the specified temperature, humidity or power source ratings. This camera is suitable for indoor and outdoor operation.** Use the camera at temperatures within -10°C~50°C (14°F~122°F) and in an IP66 compliant environment; this device is not rated as submersible. The input power source is 12VDC. **The use of properly fused or Class 2 power limited type supplies are highly recommended.**
8. **Mounting**
Use care in selecting a solid mounting surface which will support the weight of the camera plus any wind, snow, ice or other loading, and securely attach the camera to the mounting surface using screws and anchors which will properly support the camera. If necessary (e.g. when mounting to drop ceilings) use a safety wire to provide additional support for the camera.

ATTENTION! This is a class A product which may cause radio interference in a domestic environment; in this case, the user may be urged to take adequate measures.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures :

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the users' authority to operate this equipment.

1. Product Overview

Get incredible bright light *and* low light performance plus the resolution listed in the specs from the actual cameras you install. To take full advantage of the amazing images produced by this advanced imaging technology, the EverFocus Ultra Series ED705 uses a Sony Double Scan 960H_WD sensor together with a megapixel lens to produce **True Wide Dynamic Range (WDR)** performance with 720 horizontal TV lines of resolution from this unique Ultra Series 720+ camera. Combine a *native low light sensitivity of 0.05 lux* with field programmable digital slow shutter and this camera truly provides **color without compromise**: over 720TVL resolution, plus your choice of full motion color or day/night images in ultra low light (no ghosting when using *practical* DSS setting of ~4X) and Double Scan True Wide Dynamic Range for clear color images in the most challenging of bright or unbalanced scene lighting conditions. The ED705 offers a unique low profile housing with 3 axis positioning for wall or ceiling surface mounting flexibility; 3.7mm *megapixel* lens that covers a **65°** wide field of view; dual voltage operation and a full suite of OSD Menu and DSP functions controllable at the camera (3D-DNR to save DVR HDD space, digital image stabilization, privacy masking, mirroring, and much more). This is the camera that you have been waiting for to create analog CCTV systems that produce **astounding image clarity** in the widest range of indoor applications **under almost any lighting conditions**.

1.1 Features

- True Wide Dynamic Range expansion from double scan sensor plus electronic ATR-EX to deliver properly exposed images despite bright or unbalanced lighting in the scene
- Ultra resolution of over 720 horizontal TV lines for astounding image quality
- Unique low profile housing design with 3-Axis positioning for convenient wall or ceiling mounting
- Fixed 3.7mm megapixel lens captures a 67° wide field of view
- Video test output point for convenient aim and focus during installation, and ease of service
- Exview HAD II sensor delivers amazing ultra high sensitivity of .05 lux - low light sensitivity before DSS low light boost
- Adjustable low light enhancement for superlative performance without ghosting
- Color without compromise: your choice of full motion color or day/night images in low light without ghosting
- Easy to use OSD setup menu control includes a wide range of image control options
- Back light compensation (BLC) and Highlight Compensation (HLC)
- Adjustable 3D-Noise Reduction increases picture clarity while improving DVR disk storage utilization
- Privacy mask function for 15 configurable zones
- Dual voltage (12VDC/24VAC) with Anti Color Roll for stability even without line lock

5. INSTALLATION(Plastic Dome)

1. Attach the Low Profile Dome on the ceiling using the screws provided. Considering the camera angle required for the viewing angle.
2. Adjust the Lens Angle to the desired location.

TAPPING SCREW (4 x 20L) - 3EA

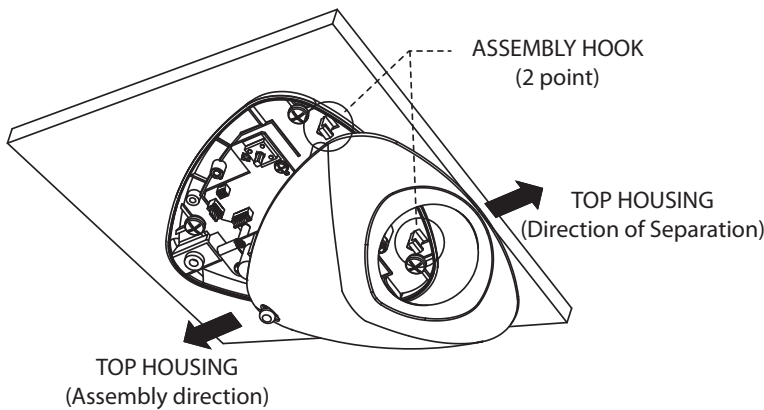

3. Connect the Service Video Output Cable and check the video image. Change the Settings accordingly using the OSD Controller.

OSD CONTROLLER

SERVICE VIDEO TEST CABLE

4. After adjusting the Lens, install the Top Cover.

M4 STAR SCREW

L-WRENCH(T-20)

5. INSTALLATION(Vandal Dome)

1. Attach the Low Profile Dome on the ceiling using the screws provided. Considering the camera angle required for the viewing angle
2. Adjust the Lens Angle to the desired location.

3. Connect the Service Video Output Cable and check the video image. Change the Settings accordingly using the OSD Controller.

4. After adjusting the Lens, install the Top Cover.

5. INSTALLATION

• MONITOR CONNECTION

- DC12V/AC24V

When you install the camera, please glue up the end of cable to keep it stable in order to protect the camera from the humidity problems.
